

Quick Link Solution

(1) Connect Coded EDACs

Reliable and readily available EDAC E3 connectors are factory-installed and numbered by experienced Pro Co technicians. They are used on plates and pull wires including multi-pin cables and connectors.

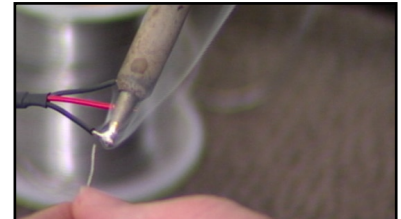

Installation of Audio Cables

“Gotchas” never end in the field. Eliminating the need for skilled labor installations reduces cost and time without reducing value. Completing installations on time has never been more reliable.

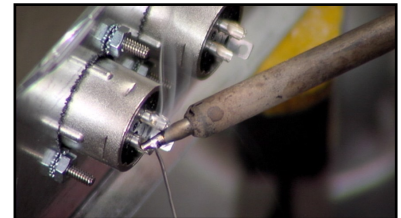

With **“Quick Link Solution”** job-costing is easier and faster with less errors. Labor costs are reduced and highly skilled technicians can be utilized for other critical job functions.

Traditional

(1) Tin Wires

(2) Tin Connectors

(3) Finish Soldering

THE CONVENIENCE OF SIMPLICITY

Quick Link Solution is a simplified method for wiring stage and studio audio breakout panels without the use of solder, punch downs or screw terminals. Using industry-proven EDAC/ELCO contacts in E3 connectors, Pro Co pre-wires the panel, and labels all terminations prior to shipping, reducing potential installation errors.

Phase-correct 3-pin EDAC connectors eliminate wiring errors

INCREASED INSTALLATION CAPACITY, SPEED AND ACCURACY

Quick Link Solution provides installers with the freedom to wire any facility without requiring skilled soldering technicians. The back of the panel is as easy to hook up as the front.
